

VIRAL SKILLS E-THEK

A COLLECTION OF 25 VIRTUAL REALITY APPS SUITABLE FOR
ADULT EDUCATION TRAININGS
WITH LOW-SKILLED AND LOW-QUALIFIED ADULTS

*Fostering Virtual Reality applications
within Adult Learning
to improve low skills and qualification*

Project No. 2018-1-AT02-KA204-039300

| Learning Content | Aerospace Engineering, Biology and Medical, Chemistry, Engineering, Food and Nutrition, Humanities, etc. | | | | | | | | | | | | | | | | | | | | | | | | | | |

| | |
|---|---|
| Learning Outcomes | As stated above with the app a variety of contents can be explored and various learning outcomes achieved. As an example, below the learning outcomes shall be stated which are relevant when using the app to learn about the “Frog Anatomy”: |
| | Knowledge |
| | <p><i>The adult learners will be able to:</i></p> <ul style="list-style-type: none"> • ...explain the structure of the frog’s nervous system and will be able to list the different parts in the nervous system. • ...explain the different parts of the circulatory system of the frog and also explain the specific functions of different organs of the frog body. • ...explain the different parts of the respiratory system and their function. |
| | Skills |
| | <p><i>The adult learners will be able to:</i></p> <ul style="list-style-type: none"> • ...locate the different parts of the nervous, circulatory and the respiratory system when having the frog’s body in front of them. • ...identify different parts of the nervous, circulatory and the respiratory system of the frog. • ...locate and identify various relevant organs and systems of the frog e.g. digestive system, lymphatic system, etc. and differentiate between them. |
| Competences | |
| <p><i>The adult learners will be able to:</i></p> <ul style="list-style-type: none"> • ...determine the relevance of various parts of the nervous, circulatory and the respiratory system regarding specific functions in the frog’s body. | |

| | |
|---|---|
| <p>Activities provided</p> | <p>Users can choose the learning content they are interested in from a library. Depending on the content mostly a short informational audio and video to the specific content is provided as well as exercises and quizzes. Learners can explore the content on their mobile phone, changing perspectives and illustrations with the touch function, explore the content with AR or Virtual Reality. In the VR mode learners can see the learning content in 360 degree, changing their perspective on the content with their head movements and gaze. For some contents additional 360-Tours are provided. Creator AVR offers single and multi-user mode and enables trainers to create and share educational experiences on the mobile device, with no programming experience needed.</p> |
| <p>Added value for low-skilled/-qualified adults</p> | <p>The app “Creator AVR” is beneficial when working with low-skilled/-qualified adult learners, especially school drop-outs, since it provides 360 degree visualizations of complex learning contents which make it easier to understand them. Further it includes quizzes which allow a more playful approach. Additionally, trainers can add their own target-group orientated contents and tasks.</p> |

| | | |
|---|--|--|
| <p>SWOT analysis</p> | <ul style="list-style-type: none"> • User-friendliness 1 <input type="checkbox"/> 2 <input type="checkbox"/> 3 <input checked="" type="checkbox"/> 4 <input type="checkbox"/> • Pedagogic orientation and standards 1 <input type="checkbox"/> 2 <input type="checkbox"/> 3 <input type="checkbox"/> 4 <input checked="" type="checkbox"/> • Applicability level 1 <input type="checkbox"/> 2 <input type="checkbox"/> 3 <input checked="" type="checkbox"/> 4 <input type="checkbox"/> • Gamification level 1 <input type="checkbox"/> 2 <input type="checkbox"/> 3 <input checked="" type="checkbox"/> 4 <input type="checkbox"/> <p><i>*1...very poor/low; 2...poor/low; 3...OK/medium; 4...good/high; 5...very good/high</i></p> | |
| | <p style="text-align: center;">STRENGTHS</p> <ul style="list-style-type: none"> • ...provides different learning approaches (e.g. videos, 360 graphics, quizzes, etc.) to contents • ...learning contents are well structured and easy to find in library • ...provides information and 360 experiences for a variety of learning contents | <p style="text-align: center;">WEAKNESSES</p> <ul style="list-style-type: none"> • ...not all learning contents can be explored in VR mode • ...little interaction with learning content possible in VR mode • ...quality of lessons provided varies |
| <p style="text-align: center;">OPPORTUNITIES</p> <ul style="list-style-type: none"> • ...allows in-depth understanding of various contents • ...allows to create lessons on one’s own • ...allows a multi-user mode | <p style="text-align: center;">THREATS</p> <ul style="list-style-type: none"> • ...the understanding of all functions of the app might require some time • ...VR experiences might be a little bit boring • ...exploring the learning content only in VR mode might have little learning effect | |

| | | |

| Learning Content | Human anatomy | | | | | | | | | | | | | | | | | | | | | | | | | | |

| | |
|--|---|
| Learning Outcomes | As stated beneath in the section “Activities provided” with the app a variety of anatomical structures can be explored and therefore various learning outcomes achieved. The learning outcomes stated below can be achieved with the free version of the app: |
| | Knowledge |
| | <p><i>The adult learners will be able to:</i></p> <ul style="list-style-type: none"> • ...explain the functionality of various parts of the circulatory, digestive, lacrimal and female reproductive system such as the functionality of the heart valves or the esophagus, etc. • ...explain the exact location of various parts of the systems mentioned above such as the location of the aortic arch or fallopian tube, etc. • ...explain the purpose of various parts of the systems mentioned above such as the purpose of the tongue, the tear duct or uterus, etc. |
| | Skills |
| | <p><i>The adult learners will be able to:</i></p> <ul style="list-style-type: none"> • ...locate and identify anatomical structures like the gastrointestinal, the female reproductive, the lacrimonasal and digestive tract as well as the arterial and venous system of the head. • ...recognise relevant parts of the anatomical structures mentioned above from the inside and locate them in the human body. |
| Competences | |
| <p><i>The adult learners will be able to:</i></p> <ul style="list-style-type: none"> • ...locate, identify and differentiate between the most important parts of the circulatory, digestive, lacrimal and female reproductive system. | |

| | |
|---|--|
| <p>Activities provided</p> | <p>Using “Anatomyou”, the user becomes part of the anatomy in an immersive way, being able to navigate along anatomical structures like the digestive, lacrimal, female reproductive and circulatory system (arterial & venous) for free. Additional navigation routes to explore e.g. the respiratory or urinary system, etc. can be purchased. Anatomyou VR can be used in two different modes: Virtual Reality and Fullscreen. In VR mode users can interact with navigation controls and anatomical information elements by aiming them.</p> |
| <p>Added value for low-skilled/-qualified adults</p> | <p>The app “Anatomyou” might be beneficial when trying to impart knowledge about the human anatomy to low-skilled/-qualified adult learners, especially those having difficulties with traditional learning methods, since the app provides an extraordinary perspective of various anatomical structures. Anatomyou allows the learners to immerse into the human body, explore it at their own pace and consequently might improve the learners’ understanding of the human anatomy.</p> |

| <p>SWOT analysis</p> | <ul style="list-style-type: none"> • User-friendliness 1 <input type="checkbox"/> 2 <input type="checkbox"/> 3 <input checked="" type="checkbox"/> 4 <input type="checkbox"/> • Pedagogic orientation and standards 1 <input type="checkbox"/> 2 <input checked="" type="checkbox"/> 3 <input type="checkbox"/> 4 <input type="checkbox"/> • Applicability level 1 <input type="checkbox"/> 2 <input type="checkbox"/> 3 <input checked="" type="checkbox"/> 4 <input type="checkbox"/> • Gamification level 1 <input checked="" type="checkbox"/> 2 <input type="checkbox"/> 3 <input type="checkbox"/> 4 <input type="checkbox"/> <p><i>*1...very poor/low; 2...poor/low; 3...OK/medium; 4...good/high; 5...very good/high</i></p> | | | | |

| Learning Content | Soft Skills Training (Training of presentation skills, public speaking, networking, communication, etc.) | | | | | | | | | | | | | | | | | | | | | | | | | | |

| | |
|-------------------|---|
| Learning Outcomes | As stated beneath in the section “Activities provided” the app provides a variety of scenarios to practice one’s soft skills and therefore various learning outcomes can be achieved. The learning outcomes stated below can be achieved with the free version of the app: |
| Knowledge | <p><i>The adult learners will be able to:</i></p> <ul style="list-style-type: none"> ...describe how different challenging scenarios like a job interview situation, presentation scenario in a conference or meeting room or a training delivery situation in class could look like. ...tell at least 10 different questions which might be asked during a job interview for at least six different job interview situations. |
| Skills | <p><i>The adult learners will be able to:</i></p> <ul style="list-style-type: none"> ...speak in front of people in challenging situations like in meetings, at conferences, in front of trainees in class or a jury within the frame of a job interview situation. ...hold eye contact while speaking to people in the situations mentioned above. ...better estimate the time needed for tasks like holding a presentation or answering an interview question, etc. ...present themselves and answer at least ten different job interview questions in front of a jury within the frame of a job interview situation. |

| | |
|-----------------------------------|---|
| | <p>Competences</p> <p><i>The adult learners will be able to:</i></p> <ul style="list-style-type: none"> • ...prepare themselves successfully for various challenging situations in which presentation and soft skills are needed e.g. job interview situations, public speaking, etc. • ...express and present themselves or/and prepared content adequately and successfully within the frame of these mentioned situations. |
| <p>Activities provided</p> | <p>The App “VirtualSpeech” provides various scenarios where users can practice their soft skills. Training rooms include public speaking, sales pitching, networking, business storytelling, media training and more. In this context the “Interview Preparation”-, “Conference Room”-, “Meeting Room”- and “Training Delivery”-Scenario can be used for free.</p> <p>The user can enter and exit rooms by pointing the hand controller towards them and activating the trigger button or aiming the VR headset at them. The rooms provide realistic environments with realistic avatars where users can practice their own public speeches, presentations, train interview situations, etc. Depending on the room users might be able to use provided transcripts of famous speeches for practice or be confronted with prepared questions (e.g. in the interview preparation scenario).</p> <p>On the VirtualSpeech website (www.virtualspeech.com) users can also purchase a variety of VR courses which combine traditional online classes with practice in VR. When purchasing one of the courses further features are available such as speech analyses and real time feedback, the upload of one’s own slides, eye contact rating, the opportunity to record and save speeches, sound and visual distractions that make the environment even more realistic, etc.</p> |

| <p>Added value for low-skilled/-qualified adults</p> | <p>The App “VirtualSpeech” might be also beneficial in terms of low-skilled and low-qualified adult learners, especially for those having difficulties to express themselves as it’s often the case in terms of migrants and refugees. Embedded in a broader training setting the app might help the learner to become more confident in speaking while allowing learners to repeat training situations as often as needed. Especially the app environment “Interview preparation” might be a useful scenario for low-skilled/-qualified adults, particularly for those who have been long-term unemployed.</p> | | | | | | | | | | | | | | | | | | | | | | | | |

| | <p>understand the handling of the app</p> | <p>“Interview Preparation” environment</p> | <ul style="list-style-type: none"> - Embed the application of the app in your course context. Since the free version of the app does not provide any instructions make sure to prepare all necessary information and instructions the adult learners need for their soft skills training. You might also prepare some training material you will provide for the learners. - Make sure the audio of the smartphones used for the VR simulation is switched on since the app provides sound effects to make the simulation even more realistic. - Depending on the environment provide maybe chairs (ideally revolving chairs) for the learners. E.g. for the “Interview Preparation” environment a seated position might be the most realistic way for training. <ul style="list-style-type: none"> • Instructions for mentoring <ul style="list-style-type: none"> - The App is quite intuitive and simple in structure. Provide your learners just with a short introduction to the app and give them a few minutes to become familiar with it. - Guide your trainees through the training process! Provide them with all necessary information in advance, give them time to practice in the VR environment what they have learned theoretically and provide them with feedback so that they can improve their performance. - After the application of the app it might be useful to discuss the experiences made by the learners. | | | |
|--|---|--|--|---------|--|--|
| <p>Ideal application /utilization</p> | <table border="1"> <thead> <tr> <th data-bbox="389 304 748 336">OPPORTUNITIES</th> <th data-bbox="748 304 1111 336">THREATS</th> </tr> </thead> <tbody> <tr> <td data-bbox="389 336 748 951"> <ul style="list-style-type: none"> • ...can work as an efficient and safe form of exposure therapy when fearing public speaking (or any other kind of speaking) • ...online courses combined with practice in VR might provide a comprehensive soft skill training • ...training situation can be repeated as often as required without any real world consequences </td> <td data-bbox="748 336 1111 951"> <ul style="list-style-type: none"> • ...free version of app for itself might have less learning/training effect since users to not get any feedback or instructions by the app to improve their speaking • ...courses might be too expensive if adult learners only have a limited budget • ...in order to being able to provide each learner with adequate feedback, using free version of app might require small or single training settings </td> </tr> </tbody> </table> | OPPORTUNITIES | | THREATS | <ul style="list-style-type: none"> • ...can work as an efficient and safe form of exposure therapy when fearing public speaking (or any other kind of speaking) • ...online courses combined with practice in VR might provide a comprehensive soft skill training • ...training situation can be repeated as often as required without any real world consequences | <ul style="list-style-type: none"> • ...free version of app for itself might have less learning/training effect since users to not get any feedback or instructions by the app to improve their speaking • ...courses might be too expensive if adult learners only have a limited budget • ...in order to being able to provide each learner with adequate feedback, using free version of app might require small or single training settings |

- ***Do's and don'ts***

- Do see and use the free version of the app as a training and practice environment, rather than a comprehensive soft skills training course that can replace your own lectureship.
- In order to being able to analyse the trainees' speeches and presentations when using the free version of the app, the Voice Memo feature of the smartphones could be useful.
- Use small group or single training settings in order to provide trainees with adequate live feedback and coaching when using the free version of the app.

| <input checked="" type="checkbox"/> German | | | | | | | | | | | | | | | | | | | | | | | | | | | |
| Learning Content | Language Learning (American English, British English, German, Italian, Spanish, French, Portuguese, Chinese, Japanese, Korean, Arabic, Hindi, Vietnamese, Indonesian, Dutch, Russian, Norwegian, Danish, Swedish, Hebrew, Greek, Rumanian, Croatian, Ukrainian, Polish, Czech, Finnish, Hungarian, Thai and Turkish) | | | | | | | | | | | | | | | | | | | | | | | | | | |

| | |
|---|---|
| Learning Outcomes | As stated above the app supports language learning for nearly all world languages. Independent of the language chosen, the following learning outcomes can be achieved: |
| | Knowledge |
| | <p><i>The adult learners will be able to:</i></p> <ul style="list-style-type: none"> • ...list at least five relevant vocabulary and phrases for each of the following topics: animals, space, vegetables and fruits • ...list relevant phrases for various scenarios (e.g. in a train, at the hotel reception, at a restaurant, etc.) which can be used to lead a conversation |
| | Skills |
| | <p><i>The adult learners will be able to:</i></p> <ul style="list-style-type: none"> • ...translate at least five relevant vocabulary and phrases for each of the following topics: animals, space, vegetables and fruits • ...pronounce at least three relevant vocabulary and phrases for each of the following topics correctly: animals, space, vegetables and fruits • ...translate and pronounce relevant phrases for various scenarios (e.g. in a train, at the hotel reception, at a restaurant, etc.) correctly |
| Competences | |
| <p><i>The adult learners will be able to:</i></p> <ul style="list-style-type: none"> • ...lead a conversation and express oneself adequately in various scenarios (e.g. in a train, at the hotel reception, at a restaurant, etc.) | |

| | |
|---|--|
| <p>Activities provided</p> | <p>In the App “Mondly: Learn Languages VR” users can choose either between six different settings to learn vocabulary beginning from fruits over vegetables to animals or decide to enter one of the eight conversation-scenarios by pointing the hand controller towards them and activating the trigger button.</p> <ul style="list-style-type: none"> • In all vocabulary learning settings, an avatar introduces the learners to relevant vocabulary and phrases by referring to the provided environment in the app and invites the learners to repeat words and phrases aloud. • Regarding the conversation-scenarios users are provided with authentic situations beginning from a dialog in a train to Berlin over a taxi ride in Hong Kong to check-in situation in a Hotel in Paris. In all scenarios, users can get to talk to avatars while adequate phrases as well as its translations are suggested for help. <p>In the conversation scenarios as well as in the vocabulary settings immediate feedback ensures that words and phrases spoken by the learners are pronounced correctly.</p> |
| <p>Added value for low-skilled/-qualified adults</p> | <p>The App “Mondly: Learn Languages VR” might be also beneficial in terms of low-skilled and low-qualified adult learners, especially for refugees and migrants who are often challenged to become familiar with a completely new language and culture. Unlike traditional language learning the VR app allows to learn the new language in an interactive way, to practice speaking in realistic scenarios and consequently prepares the learners for everyday situations.</p> |

| | | |
|---|--|---|
| <p>SWOT analysis</p> | <ul style="list-style-type: none"> • User-friendliness 1 <input type="checkbox"/> 2 <input type="checkbox"/> 3 <input type="checkbox"/> 4 <input checked="" type="checkbox"/> • Pedagogic orientation and standards 1 <input type="checkbox"/> 2 <input type="checkbox"/> 3 <input checked="" type="checkbox"/> 4 <input type="checkbox"/> • Applicability level 1 <input type="checkbox"/> 2 <input type="checkbox"/> 3 <input type="checkbox"/> 4 <input checked="" type="checkbox"/> • Gamification level 1 <input checked="" type="checkbox"/> 2 <input type="checkbox"/> 3 <input type="checkbox"/> 4 <input type="checkbox"/> <p><i>*1...very poor/low; 2...poor/low; 3...OK/medium; 4...good/high; 5...very good/high</i></p> | |
| | <p>STRENGTHS</p> <ul style="list-style-type: none"> • ...offers language learning for nearly all world languages • ...provides learners with immediate feedback on their pronunciation • ...allows to learn languages in interactive and realistic scenarios | <p>WEAKNESSES</p> <ul style="list-style-type: none"> • ...provides only limited vocabulary settings and vocabulary • ...when using the App with Daydream smartphone gets really hot after some time • ...is not for free (depending on VR hardware may cost up to ~8 Euros) |
| <p>OPPORTUNITIES</p> <ul style="list-style-type: none"> • ...can be ideal to learn the most important phrases and vocabulary for certain scenarios e.g. scenario “Hotel: Reception” • ...might arouse learners’ interest for language learning • ...allows learners to practice their pronunciation | <p>THREATS</p> <ul style="list-style-type: none"> • ...vocabulary settings might get a little bit boring after a while since the avatar is speaking really slowly • ...some vocabulary settings might be not that relevant for everyday situations e.g. setting “space” • ...in order to learn the language properly an additional language | |

| | | | | |
|---------------------------------------|--|---|--|---|
| | | course might be needed since the app imparts no further knowledge about grammar, etc. | | <p>the learners to write them down after the VR lesson.</p> <ul style="list-style-type: none"> - After the application of the app it might be useful to discuss the experiences made by the learners and/or to let them summarize what they've learned. <p>Do's and don'ts</p> <ul style="list-style-type: none"> - Do see the app as an additional learning and teaching tool which can help to learn important phrases in a language, rather than an app which can replace a comprehensive language learning course. - If the course content fits with the vocabulary learning settings provided by the app the exploration of these might be an interesting way to introduce the new topic. - In order to embed the app in a more comprehensive learning context, it might be an idea e.g. to explain grammar rules based on the phrases learned in the app or to provide learners with further possibilities to enrich their vocabulary about contents addressed. - The app might be also a successful tool in context of blended learning formats. In this context, learners could e.g. be provided with certain tasks or be encouraged to use the app as a practice tool. |
| Ideal application /utilization | <ul style="list-style-type: none"> - Context of ideal application Ideal to enhance a language learning course - Instructions for preparation <ul style="list-style-type: none"> - Choose one or more scenarios and/or vocabulary learning settings which you want the learners to explore and make yourself familiar with the content. - Embed the application of the app in your course context. - Make sure that the audio as well as the microphones of the smartphones used for the VR simulation are switched on so that learners can practice their pronunciation and hear the guidance of the avatars. - Provide maybe chairs (ideally revolving chairs) for the learners since the most comfortable way to explore the App might be in a seated position. - Instructions for mentoring <ul style="list-style-type: none"> - The app is quite simple in structure. Provide your learners with a short introduction to the app and give them some time to watch the tutorials of the app so that they can become familiar with the handling. - It might be useful to write down the most important phrases or vocabulary of each scenario/vocabulary learning setting. Alternatively, you could also ask | | | |

| Learning Content | <p>YouTube VR: Through this application, you can experience your favorite YouTube videos, channels and creators in virtual reality. The YouTube VR app basically can turn any video into a virtual reality experience and makes YouTube a 3D world you can explore from the inside.</p> | | | | | | | | | | | | | | | | | | | | | | | | | | |

| | |
|---------------------|---|
| Learning Outcomes | <p>Knowledge</p> <p><i>The adult learners will be able to:</i></p> <ul style="list-style-type: none"> Follow the basic steps to set up and use the application for learning purposes List at least 3 possible ways they can use the application for teaching and learning |
| | <p>Skills</p> <p><i>The adult learners will be able to:</i></p> <ul style="list-style-type: none"> Set up and use the application in a practical way Download and upload content of their interest to be viewed through the application Follow required steps to debug if any problems show up during the use of the application with users Indicate and describe ideas to integrate this application in various education contexts Browse and select relevant content from different channels and videos |
| | <p>Competences</p> <p><i>The adult learners will be able to:</i></p> <ul style="list-style-type: none"> Demonstrate capability to use successfully all functionalities of the app |
| Activities provided | <p>Users can select from a variety of different topics/context/channels/videos based on the learning content and they have the opportunity to further explore the content in 3D mode/virtual reality as an introductory, evaluation or as an exploration activity.</p> |

| Added value for low-skilled/-qualified adults | The application is highly suitable for HEI as an introductory practical example because it is easy to get started as a user. Even users with very limited skills can easily get started since most of the users are already familiar with the ordinary YouTube application. | | | | | | | | |
|---|--|-----------|------------|---|--|---------------|---------|---|---|

|---------------------------------------|---|--|
| | <ul style="list-style-type: none"> • Gives users independence to choose material according to the chosen topic | <ul style="list-style-type: none"> • Might be addictive to users since it has videos to watch |
| Ideal application /utilization | <ul style="list-style-type: none"> • Context of ideal application <p>The application can be used in almost all context, since it gives users the opportunity to select any domain/ sector and select relevant channels/videos for exploration in virtual reality. It is an application which gives the flexibility to users to watch a video in virtual reality instead in 2D mode, by making the content even more interesting.</p> <p>This application can also be used in almost all contexts as an additional activity to gain better understanding of a topic during a learning activity.</p> <ul style="list-style-type: none"> • Instructions for preparation <p>The application supports most VR devices and hardware, and has a single/multi-user capability. The app can be downloaded conveniently from the VR device search engine and will require registration through the account of the device.</p> <p>The users do not require to move around while using this application.</p> <p>It is more convenient for users to have a chair.</p> <p>A microphone is useful if you also want to search video content with your voice</p> | |

- ***Instructions for mentoring***

Ideal application for the start of a training. It is advisable that the mentor has clear learning objectives of what he/she wants to achieve before using this application.

It is advisable that tutors after the initial discussion, encourage learners to experience the application individually and then work in pairs and in groups on the content that they will experience.

It is also advisable that the app will not be used for a long time so users don't lose interest.

- ***Do's and don'ts***

Don't use this application, without having specific objectives to be achieved, as this might make users lose easily their confidence and misrepresent the additional use of this application

| Learning Content | <p>A virtual reality journey into a world beyond sight.</p> <p>Specifically, the protagonist, after decades of steady deterioration, he became totally blind.</p> <p>To help him make sense of the upheaval in his life, he began documenting his experiences on audio cassette.</p> | | | | | | | | | | | | | | | | | | | | | | | | | | |

| | |
|----------------------------|--|
| | These original diary recordings form the basis of this six-part VR experience, an interactive non-fiction using new forms of storytelling and gameplay mechanics to explore his cognitive and emotional experience of blindness. |
| Learning Outcomes | <p>Knowledge</p> <p><i>The adult learners will be able to:</i></p> <ul style="list-style-type: none"> mention the major differences in a blind and a sighted person according to this app |
| | <p>Skills</p> <p><i>The adult learners will be able to:</i></p> <ul style="list-style-type: none"> Show respect for people with disabilities and especially for blind people Demonstrate empathy towards blind people Evaluate ways to apply VR in their own education settings as part of their work |
| | <p>Competences</p> <p><i>The adult learners will be able to:</i></p> <ul style="list-style-type: none"> Raise awareness about disabled people and disabilities in general Demonstrate a positive attitude and respect towards people with disabilities Explain ideas to integrate this application in various education contexts |
| Activities provided | The application gives the opportunity to explore the protagonist's cognitive and emotional experience of blindness through diary recordings. Each chapter addresses a memory, a moment and a specific location from the protagonist's audio diary. Through the application, you get a visual spectacle of sound and how it affects the environment around you for someone that is blind. |

| Added value for low-skilled/qualified adults | <p>This application has a low floor- meaning that it can be used by anyone without any difficulty. This application does not require any interaction with the hardware, so people with no-prior knowledge can use it without knowing anything specific about VR. Users can just watch animated chapters, experience them and reflect on what they are watching.</p> | | | | | |
|--|--|--|-----------|------------|--|---|

| Learning Outcomes | Knowledge |
| | n/a |
| | Skills |
| | <p><i>The adult learners will be able to:</i></p> <ul style="list-style-type: none"> • Develop communication and networking skills • Navigate effectively through the app to access the different “uses” of the app: ‘social sharing’, ‘people options’, ‘settings’ etc. to get the most out of this application |
| | Competences |
| | <p><i>The adult learners will be able to:</i></p> <ul style="list-style-type: none"> • Classify appropriate VR systems to the training needs of HEI and SMEs to successfully integrate VR technologies • Develop social competences and handle social interactions effectively |
| Activities provided | This social co-viewing application allows viewers to chat with their friends as they watch events around the worlds. The application also allows multiple user interaction, which means a tutor can accompany the learner in the VR space. The application allows group interaction, which highlights the capabilities of VR. The group interaction also demonstrates much of the communication dynamics, interaction and pedagogical considerations of VR environments. |
| Added value for low-skilled/-qualified adults | The application is essentially a social platform rather than a learning platform but is valuable as it allows users to learn the first basic skills needed within a VR environment including, communication, navigation and group interaction. |

| | | |
|----------------------|--|---|
| SWOT analysis | <ul style="list-style-type: none"> • User-friendliness 1 <input type="checkbox"/> 2 <input type="checkbox"/> 3 <input checked="" type="checkbox"/> 4 <input type="checkbox"/> • Pedagogic orientation and standards 1 <input type="checkbox"/> 2 <input type="checkbox"/> 3 <input checked="" type="checkbox"/> 4 <input type="checkbox"/> • Applicability level 1 <input type="checkbox"/> 2 <input type="checkbox"/> 3 <input type="checkbox"/> 4 <input checked="" type="checkbox"/> • Gamification level 1 <input type="checkbox"/> 2 <input type="checkbox"/> 3 <input checked="" type="checkbox"/> 4 <input type="checkbox"/> <p><i>*1...very poor/low; 2...poor/low; 3...OK/medium; 4...good/high; 5...very good/high</i></p> | |
| | STRENGTHS | WEAKNESSES |
| | <ul style="list-style-type: none"> • Opportunity to experience different kind of live events (sports events, comedy shows, etc), from the comfort of your own space for free, even in front seats • Amazing graphics and sense of being 'there' • Available in multiple VR platforms | <ul style="list-style-type: none"> • It only allows you to connect via a Facebook account to have access in application's content • It always requires internet connection • Frequent interruptions in connections with events |

| | |
|--------------------------|--|
| Learning Content | The history of Anne Frank House. The application gives the opportunity to travel back to the years of the Second World War and wander through the rooms of the Annex that housed the group of 8 Jewish people as they hid from the Nazis. |
| Learning Outcomes | <p>Knowledge</p> <p><i>The adult learners will be able to:</i></p> <ul style="list-style-type: none"> Recall the story of Anne Frank and what happened to the Annex’s brave inhabitants |
| | <p>Skills</p> <p><i>The adult learners will be able to:</i></p> <ul style="list-style-type: none"> Navigate in the virtual environment to grab things, solve clues Demonstrate critical thinking skills via the navigation to the virtual environment |
| | <p>Competences</p> <p><i>The adult learners will be able to:</i></p> <ul style="list-style-type: none"> Gain control of their education and learn at their own pace |

| | |
|---|---|
| <p>Activities provided</p> | <p>This application can really transform the way the educational content about this topic can be delivered. Users can interact in the interactive and immersive application to learn the history of Anne Frank in a safe, controlled way.</p> <p>The tutor can make breaks between the interaction of users with this application in order to deepen in specific aspects that is needed and then let the learner continue its experience in this award-winning experience.</p> |
| <p>Added value for low-skilled/-qualified adults</p> | <p>This application can stimulate the interest and motivation of low-skilled/qualified adults to be engaged in history and learn about the 2nd world war and the case of Anne Frank. The application is really engaging and has strong gamifications characteristics which will make enthusiastic all learners to be engaged in this environment and learn as much as they can. The application due to the power of VR can support learners to find out what happened to the Annex' brave inhabitants.</p> <p>Additionally, since this is a single mode application, learners can learn in their own pace.</p> |

| <p>SWOT analysis</p> | <ul style="list-style-type: none"> • User-friendliness 1 <input type="checkbox"/> 2 <input type="checkbox"/> 3 <input checked="" type="checkbox"/> 4 <input type="checkbox"/> • Pedagogic orientation and standards 1 <input type="checkbox"/> 2 <input type="checkbox"/> 3 <input type="checkbox"/> 4 <input checked="" type="checkbox"/> • Applicability level 1 <input type="checkbox"/> 2 <input type="checkbox"/> 3 <input checked="" type="checkbox"/> 4 <input type="checkbox"/> • Gamification level 1 <input type="checkbox"/> 2 <input type="checkbox"/> 3 <input type="checkbox"/> 4 <input checked="" type="checkbox"/> <p><i>*1...very poor/low; 2...poor/low; 3...OK/medium; 4...good/high; 5...very good/high</i></p> | | | | |

| | |
|---------------------------------------|---|
| Ideal application /utilization | <ul style="list-style-type: none"> • <i>Context of ideal application</i> Documentary & History and educational contexts with history element. • <i>Instructions for preparation</i> An introductory discussion would be good to be made. The application works in a single game mode, so equipment should be sufficient for all participants. The application required that participants are not so close to each other, so they can interact safely in the VR environment. • <i>Instructions for mentoring</i> Tutors can encourage some breaks between activities in the application to deepen in specific aspects and also so that they avoid learners to become dizzy from long interactions with the application. • <i>Do's and don'ts</i> Do: have enough VR devices for all participants since the experience takes time. Alternatively, you can create groups that will work with the VR in a row, while others interact with other relevant material. Don't: Don't let users be close to each other. The application needs some space for participants to move and grab or transfer things. |

| Learning Content | Arts & Culture (Paintings specifically) | | | | | | | | | | | | | | | | | | | | | | | | | | |

| | |
|---------------------|--|
| Learning Outcomes | <p>Knowledge</p> <p><i>The adult learners will be able to:</i></p> <ul style="list-style-type: none"> • Know and be able to differentiate between at least 5 famous painters and their paintings • Understand background information about the era, stories and motif of a painting and being able to differentiate between them • Gain understanding of an era/different cultures |
| | <p>Skills</p> <p><i>The adult learners will be able to:</i></p> <ul style="list-style-type: none"> • Navigate through a VR environment with the use of sight and hand motion |
| | <p>Competences</p> <p><i>The adult learners will be able to:</i></p> <ul style="list-style-type: none"> • Prioritize interests through the choice of a gallery • Demonstrate holistic thinking by connecting knowledge about paintings and related era and culture. • Curiosity through exploration • Be more open-minded towards different cultures and backgrounds. |
| Activities provided | Choose from a set of art galleries with different topics. Pick a gallery and find various paintings to explore. For each painting there is an audio guide with information regarding the painter, description of the painting, era, pictorial motif and background story. One can also additionally find an informative text for each painting and there is the possibility to explore the painting visually. |

| <p>Added value for low-skilled/qualified adults</p> | <ul style="list-style-type: none"> - Collection of interesting paintings and focus on important background information such as eras and cultural characteristics. The pre-selection of the content and the assignment to different topics enables low-skilled adults to navigate through the information easily. - The information is given through an audio guide so that there is no necessity for high level reading skills. - Explore paintings visually without having to physically be at a museum, etc. | | | | | | | | | | | | |

|--|--|---|
| | <p>OPPORTUNITIES</p> <ul style="list-style-type: none"> • Possibility to choose galleries of interest • Learn about famous paintings and their stories and thereby develop an understanding of cultures and eras • Explore paintings visually | <p>THREATS</p> <ul style="list-style-type: none"> • Individuals with background knowledge might not be provided with further information • Videos or guided tours might be more interesting • Further research must be done elsewhere |
| <p>Ideal application /utilization</p> | <ul style="list-style-type: none"> • Context of ideal application In art or history education contexts or museums (to provide a wider range of possible paintings to explore) • Instructions for preparation No necessary instructions for preparation. The App is quite intuitive and simple in structure. You can choose a gallery topic and then painting in which you are interested. • Instructions for mentoring Short introduction regarding the topics of the paintings and what to expect. A possible task for the learner could include to choose one gallery and explore the topic, different paintings and backgrounds in detail to gain a thorough understanding instead of trying to gather information about every topic/gallery at once. | |

- *Do's and don'ts*

Give a short introduction regarding the structure of the app in advance.

Discuss the different exploration paths of the learner, e.g. which galleries were chosen, which paintings were explored, and which information was the most relevant and interesting?

| Learning Content | Expeditions to real places in the world, historic events, space or the body. | | | | | | | | | | | | | | | | | | | | | | | | | | |

| | |
|---------------------|---|
| Learning Outcomes | <p>Knowledge</p> <p><i>The adult learners will be able to:</i></p> <ul style="list-style-type: none"> • Connect information of animals, places, nature and processes • Self-research to participate in Expeditions quiz (only in guide modus) |
| | <p>Skills</p> <p><i>The adult learners will be able to:</i></p> <ul style="list-style-type: none"> • Navigate through a VR environment with the use of sight and hand motion • Do desk-research (for expeditions quiz) and self-learning (only in guide modus) independently |
| | <p>Competences</p> <p><i>The adult learners will be able to:</i></p> <ul style="list-style-type: none"> • Prioritize interests through the choice of an area to explore • Work/learn more independently as the app fosters this in its setup with the need to self-explore an environment |
| Activities provided | <p>Choose a place to explore, e.g. an underwater area. Explore different scenes and learn through an audio guide or written information about the place, flora, fauna, natural phenomena, the body etc. by pointing on different elements in the space.</p> <p>All tours can be managed and instructed by a tour guide by use of a tablet - ideal for teaching and learning in classes.</p> <p>An Expeditions quiz can also be taken.</p> |

| <p>Added value for low-skilled/qualified adults</p> | <p>Explore places which are otherwise not physically reachable and gain a visual impression of them. Receive condensed information about the area also through an audio guide. Especially low-skilled adults can profit from the combination of exploration by sight and receiving information through audio.</p> | | | | | | | | | | | | | |
|--|--|--|---|---|---|---|---|---|--|---|-----------|------------|--|--|

| STRENGTHS | WEAKNESSES | | | | | | | | | | | | | | | | | | | | | | | | |
| <ul style="list-style-type: none"> • Possibility to virtually emerge into the scene of the story • Different topics to choose from • Detailed background information in each video | <ul style="list-style-type: none"> • Low resolution especially in the 360° spaces • Very opinionated documentaries • Rough topics such as wars and genocide | | | | | | | | | | | | | | | | | | | | | | | | |

| | | |
|--|--|---|
| | <p>OPPORTUNITIES</p> <ul style="list-style-type: none"> • Get emotionally involved into the topic/scene displayed • Each user can find a topic which interests them • User might get captivated by a story | <p>THREATS</p> <ul style="list-style-type: none"> • Users might prefer to simply watch a video on a website • Especially low-skilled adults might not be able to comprehend that some videos display subjective opinions • It might be disturbing for some viewers to virtually emerge, for example, into a war scene |
| <p>Ideal application /utilization</p> | <ul style="list-style-type: none"> • Context of ideal application In a university, adult education classes or in a museum in the context of journalism, politics and current affairs since especially for low-skilled adults there is a need for reflection and discussion after using the apps. The app is not suitable for children. • Instructions for preparation Be aware, that the app contains scenes and information which some users might find disturbing especially since the user might feel as if he/she is virtually in that scene, e.g. war or genocide. • Instructions for mentoring Choose a topic to watch which the user feels comfortable with. Spend time after the use of the app to reflect and | |

discuss the topics watched since there are sometimes subjective opinions displayed.

- ***Do's and don'ts***

Give a short introduction to the use of the app.

Do not let learners use the app on their own without time for reflection afterwards.

| Learning Content | Spanish Vocabulary | | | | | | | | | | | | | | | | | | | | | | | | | | |

| | |
|--|--|
| Learning Outcomes | Knowledge |
| | <p><i>The adult learners will be able to:</i></p> <ul style="list-style-type: none"> Understand the meaning of around 15 basic Spanish words in the context of a school and a house Pronounce those Spanish words since they can be listened to in the app in Spanish |
| | Skills |
| | <p><i>The adult learners will be able to:</i></p> <ul style="list-style-type: none"> Navigate through a VR environment with the use of sight |
| | Competences |
| | <p><i>The adult learners will be able to:</i></p> <ul style="list-style-type: none"> Study independently and with initiative since the selection of different furniture is necessary in the app to learn about the meaning of the word in Spanish |
| Activities provided | Virtually go through a school and a house. By looking at certain objects such as a TV, a chair or a painting and clicking on them, one will hear the Spanish word and one will be able to read the Spanish and English word at the same time. |
| Added value for low-skilled/-qualified adults | Listening to new vocabulary and seeing the objects while hearing the words helps low-skilled adults to learn a new language more easily with the connection sight and hearing. The small number of new words to learn in Spanish in the app can also help the target group to focus and not be overwhelmed since the object can also be clicked on as often as needed. |

| | | |
|--|---|---|
| SWOT analysis | <ul style="list-style-type: none"> • User-friendliness 1 <input checked="" type="checkbox"/> 2 <input type="checkbox"/> 3 <input type="checkbox"/> 4 <input type="checkbox"/> • Pedagogic orientation and standards 1 <input type="checkbox"/> 2 <input checked="" type="checkbox"/> 3 <input type="checkbox"/> 4 <input type="checkbox"/> • Applicability level 1 <input checked="" type="checkbox"/> 2 <input type="checkbox"/> 3 <input type="checkbox"/> 4 <input type="checkbox"/> • Gamification level 1 <input checked="" type="checkbox"/> 2 <input type="checkbox"/> 3 <input type="checkbox"/> 4 <input type="checkbox"/> | |
| | <p>*1...very poor/low; 2...poor/low; 3...OK/medium; 4...good/high; 5...very good/high</p> | |
| | STRENGTHS | WEAKNESSES |
| | <ul style="list-style-type: none"> • Hearing the vocabulary • Seeing the object while getting to know the Spanish words for it • Interactive learning environment | <ul style="list-style-type: none"> • Very limited vocabulary offered (Only two settings (school and house) with a few with a few objects) • Very artificial set-up (rooms do not look real) • Voice has slight American accent while pronouncing the words |
| | OPPORTUNITIES | THREATS |
| <ul style="list-style-type: none"> • Connecting visual and listening skills • Fun while learning new words | <ul style="list-style-type: none"> • No added value for people who want to get to know vocabulary from different settings • Missing the feeling of “virtual reality” might lead to less interest in the app • Learning vocabulary with a “wrong” pronunciation” | |

| | |
|---------------------------------------|---|
| Ideal application /utilization | <ul style="list-style-type: none"> • Context of ideal application In a language learning environment for low-skilled individuals- • Instructions for preparation One must look at the different object and click on it, to receive audio and written words. • Instructions for mentoring After the use of the App, review which words were learned. • Do’s and don’ts Do not use the App for people who already know Spanish since there is no option to go to different levels and the amount of new words might be quite small. Highly qualified people might not get a benefit from the app. |

| Learning Content | Design and illustration, Educational, Training software, Accessories | | | | | | | | | | | | | | | | | | | | | | | | | | | | |

| | |
|---|--|
| Learning Outcomes | Knowledge <i>The adult learners will be able to:</i> <ul style="list-style-type: none"> • ...understand the foundations of vector calculus • ...understand Parameterized Functions • ...understand Integral modeling functionality |
| | Skills <i>The adult learners will be able to:</i> <ul style="list-style-type: none"> • ...manipulate 3D Graphs • ...Mathematical Modeling • ...Edit Parameters on the Fly |
| | Competences <i>The adult learners will be able to:</i> <ul style="list-style-type: none"> • ...start with the Basics Vector Addition • ...move to Integrals • ...start with spherical coordinate mapping |
| Activities provided | Through the constant guidance of the lecturer, the learner will retrace through the Calcflow virtual reality what previously learned in the lecture. The teacher will pause the learner in particular moments of the vision in order to point out the mathematical concept. |
| Added value for low-skilled/-qualified adults | <p>Moving through the data set in room scale VR is completely different from seeing and manipulating a 2D projection of it on a screen. Exploration is much more intuitive (just move your head!) and the perfect depth information that learners perceive feels almost like an additional input channel to the brain.</p> <p>Attacking big STEM concepts in VR seems to light up new neural networks, enabling learners to process them with the synergy of our whole brain. Natural movement and visualization send users down fresh cognitive pathways.</p> |

| | STRENGTHS | | WEAKNESSES | |
| | <ul style="list-style-type: none"> • ...improve learning • ...improves the spatial visualization capabilities of geometric figures • ...stimulates critical thinking | | <ul style="list-style-type: none"> • ...dependence on the hardware platform • ...discontinuous updates • ...difficulty finding qualified teaching staff | |
| | OPPORTUNITIES | | THREATS | |
| <ul style="list-style-type: none"> • ...software creation for many application fields • ...links between different devices • ...insert elements of AR | | <ul style="list-style-type: none"> • ...potential privacy problems • ...any technical problems or delays in the application development phase • ...failure to reach the required level of experience | | |

| | |
|---------------------------------------|--|
| Ideal application /utilization | <ul style="list-style-type: none"> • Context of ideal application Mathematical and geometry training. • Instructions for preparation It is very important for the positive outcome of the activity to prepare the virtual reality laboratory with different time in advance. Each personal computer with the connected VR viewer must have all the management software (operating system, drivers) updated. The display must be perfectly calibrated. The Calcflow software will need to be installed as a system administrator and the launcher icon will be available on the desktop. The learner will not in any way be able to change all the system settings. • Instructions for mentoring The instructor should explain the mathematical concept and give a graphic representation of it on the blackboard through a lecture. The instructor will explain how through virtual reality it will be possible to see in 3D what is shown on the blackboard. During the use of the viewer and the application it will constantly follow the learner in analyzing the mathematical concept. The adult educator will be able to intervene immediately where there are problems of a technical or learning nature. The adult educator must have prepared a small guide to explain to the learner all the steps of the activity to be performed with the viewer and the Calcflow software. At the end of the activity a questionnaire might be useful to assess the activity performed. |
|---------------------------------------|--|

- *Do's and don'ts*

To use correctly you need to calibrate the viewer by focusing carefully finding the right distance between the two lenses.

Periodically clean the foam rubber that is in contact with the skin, clean the viewer lenses often with the special cloth.

Due to small delays (latencies) and small inaccuracies of the gyroscope it is good to move slowly and alternate the virtual immersion activity with pauses by removing the viewer.

| | |
|----------------------------|--|
| Learning Outcomes | Knowledge |
| | <p><i>The adult learners will be able to:</i></p> <ul style="list-style-type: none"> • ...understand the functions of Space Station • ...understand 3D model of ISS that can be placed in Microsoft’s Mixed Reality Cliff House • ...understand how technology allows to feel like an astronaut |
| | Skills |
| Activities provided | <p><i>The adult learners will be able to:</i></p> <ul style="list-style-type: none"> • ...manipulate 3D model of ISS • ...recognize all that is visible from the Space Station • ...recognize physical laws |
| | Competences |
| | <p><i>The adult learners will be able to:</i></p> <ul style="list-style-type: none"> • ...to watch International Space Station movies while virtually inside the Station • ...immersive experience of being an astronaut working on ISS • ...check how is to levitate in weightlessness <p>Through the constant guidance of the lecturer, the learner will improve educational tour of the International Space Station (ISS). The teacher will pause the learner in particular moments of the vision in order to point out the physical laws concept.</p> |

| <p>Added value for low-skilled/-qualified adults</p> | <p>Moving through the data set in room scale VR is completely different from seeing and manipulating a 2D projection of it on a screen. Exploration is much more intuitive (just move your head!) and the perfect depth information that you perceive feels almost like an additional input channel to the brain.</p> <p>Attacking big astronomy and physical laws concepts in VR seems to light up new neural networks, enabling us to process them with the synergy of our whole brain. Natural movement and visualization send users down fresh cognitive pathways.</p> | | | | | | | | | | | | | | | | | | | | | | | | |

| | <p style="text-align: center;">OPPORTUNITIES</p> <ul style="list-style-type: none"> • ...software creation for many application fields • ...links between different devices • ...insert elements of AR | <p style="text-align: center;">THREATS</p> <ul style="list-style-type: none"> • ...potential privacy problems • ...any technical problems or delays in the application development phase • ...failure to reach the required level of experience |
| <p>Ideal application /utilization</p> | <ul style="list-style-type: none"> • <i>Context of ideal application</i> <p>Astronomy and physical laws training.</p> <ul style="list-style-type: none"> • <i>Instructions for preparation</i> <p>It is very important for the positive outcome of the activity to prepare the virtual reality laboratory with different time in advance. Each personal computer with the connected VR viewer must have all the management software (operating system, drivers) updated. The display must be perfectly calibrated.</p> <p>The International Space Station Tour VR software will need to be installed as a system administrator and the launcher icon will be available on the desktop. The learner will not in any way be able to change all the system settings.</p> <ul style="list-style-type: none"> • <i>Instructions for mentoring</i> <p>The instructor should explain the astronomy and physical laws concept and give a graphic representation of it on the blackboard through a lecture. The instructor will explain how through virtual reality it will be possible to see in 3D what is shown on the blackboard.</p> | |

During the use of the viewer and the application it will constantly follow the learner in analyzing the mathematical concept.

The adult educator will be able to intervene immediately where there are problems of a technical or learning nature.

The adult educator must have prepared a small guide to explain to the learner all the steps of the activity to be performed with the viewer and the International Space Station Tour VR software.

At the end of the activity a questionnaire will be given to assess the activity performed.

- ***Do's and don'ts***

To use correctly you need to calibrate the viewer by focusing carefully finding the right distance between the two lenses.

Periodically clean the foam rubber that is in contact with the skin, clean the viewer lenses often with the special cloth.

Due to small delays (latencies) and small inaccuracies of the gyroscope it is good to move slowly and alternate the virtual immersion activity with pauses by removing the viewer.

| Learning Content | In Wonders of the world learners will visit a small number of the ancient wonders including the Colossus of Rhodes, Taj Mahal and Machu Picchu. At each of these sites they can learn about its history and its historical significance to the local area and the world through an immersive and interactive experience. | | | | | | | | | | | | | | | | | | | | | | |

| | |
|-------------------|--|
| Learning Outcomes | <p>Knowledge</p> <p><i>The adult learners will be able to:</i></p> <ul style="list-style-type: none"> • Identify core concepts and process of learning through a VR experience • Connect the significance of historical events/buildings to the present day • Recognise of what day-to-day life was like for individuals living at the time |
| | <p>Skills</p> <p><i>The adult learners will be able to:</i></p> <ul style="list-style-type: none"> • Complete simple steps and task required to use the application and complete the tasks assigned • Use the VR equipment effectively in order to complete assigned tasks • Solve simple puzzles/games to obtain information relevant to the completion of tasks • Navigate in an open world environment • Navigate through the app including working the controls and handling interactions with NPC's (non-player characters) |
| | <p>Competences</p> <p><i>The adult learners will be able to:</i></p> <ul style="list-style-type: none"> • Demonstrate the ability to undertake and complete an engaging VR experience • Demonstrate the ability to follow instructions and complete tasks as required • Demonstrate the ability to extract and sort information relevant to the completing of tasks • Demonstrate the capacity to think critically about a number of different situations and to apply information gain in the correct context |
| | |

| | |
|---|---|
| <p>Activities provided</p> | <p>The learning outcomes will be achieved by:</p> <ul style="list-style-type: none"> • Visiting the historical locations‘ first hand’ • Interacting with historical individuals throughout the game • Completing puzzles/games/tasks • Taking on the role of an individual from each time period and immersing themselves in the world |
| <p>Added value for low-skilled/-qualified adults</p> | <p>While there is limited added value for low-skilled/qualified adults, the following do assist in making the application easy to engage with for all users:</p> <ul style="list-style-type: none"> • Clear instructions provided throughout • The application is particularly visual in nature, offering user friendly graphics which would benefit those not used to interactive experiences or gaming • Application is learning oriented but those so through gamification rather than through traditional learning techniques • The learning process can be implemented according to the learners’ skills and abilities, allowing for engagement with a wide audience |

| | |
|-------------------|--|
| Learning Content | <p>Unimersiv claims to be the largest platform for VR educational experiences and applications available. The app itself provides access to a number of different learning experiences which include field trips (ISS, Acropolis of Athens etc.) which enable users to learn using VR technologies.</p> <p>Currently available for free (on oculus devices only), the learning content includes VR experiences covering the following:</p> <ul style="list-style-type: none"> • Human Body / Human Brain • International Space Station • Historical places • Dinosaurs • Titanic <p>More elaborate learning content in respect of all of these topics are available through the paid version of the app. The platform provider, Unimersiv, also offers customised VR training solutions (e.g. VR forklift training), however, this is an additional paid service.</p> |
| Learning Outcomes | <p>Knowledge</p> <p><i>The adult learners will be able to:</i></p> <ul style="list-style-type: none"> • Identify core concepts and process of learning through a VR experience • Recall the anatomy of a human body and the functions of the brain • Describe conditions on the International Space Station |

| | | | |
|--|--|--|--|
| | <ul style="list-style-type: none"> • Identify some of the most important historical civilisations and places in Europe, including the city of Ancient Rome and the Acropolis of Athens in Greece • Describe 12 different types of dinosaur and how they interacted with their environment • Describe both the interior and exterior of the famous Titanic cruise liner | Activities provided | <p>Each app provides different activities for learners to undertake and these are tailored toward the content of each of the modules. These can be roughly summarised into the following:</p> <ul style="list-style-type: none"> • Open world exploration • Guided, liner tours (interaction with menus) • Audio descriptions which learners listen to as they progress through the activity |
| | Skills <p><i>The adult learners will be able to:</i></p> <ul style="list-style-type: none"> • Complete simple steps and task required to use the application and complete the tasks assigned • Use the VR equipment effectively in order to complete assigned tasks • Control and navigate through the different environments using a number of physical movements and actions | Added value for low-skilled/-qualified adults | <p>High potential for added value for low-skilled/qualified adults which include:</p> <ul style="list-style-type: none"> • Fully guided experiences with good quality learning content throughout • Wide variety of learning experiences which motivate learners to continue with experiences • VR experiences, while immersive, are suitable for beginners • The content is learning oriented rather than focused on gaming, as such it affords learners the ability to proceed at their own pace rather than being pressured to completed set or defined tasks |
| | Competences <p><i>The adult learners will be able to:</i></p> <ul style="list-style-type: none"> • Demonstrate the ability to undertake and complete an engaging VR experience • Demonstrate the ability to follow instructions and complete tasks as required • Demonstrate the ability to interact with and learn from a number of different sources of information including visual and audio. • Learn independently using the resources provided as part of the app | | |

| | | |
|--|---|--|
| SWOT analysis | <ul style="list-style-type: none"> • User-friendliness 1 <input type="checkbox"/> 2 <input type="checkbox"/> 3 <input type="checkbox"/> 4 <input checked="" type="checkbox"/> • Pedagogic orientation and standards 1 <input type="checkbox"/> 2 <input type="checkbox"/> 3 <input checked="" type="checkbox"/> 4 <input type="checkbox"/> • Applicability level 1 <input type="checkbox"/> 2 <input type="checkbox"/> 3 <input checked="" type="checkbox"/> 4 <input type="checkbox"/> • Gamification level 1 <input type="checkbox"/> 2 <input checked="" type="checkbox"/> 3 <input type="checkbox"/> 4 <input type="checkbox"/> | |
| | <p><i>*1...very poor/low; 2...poor/low; 3...OK/medium; 4...good/high; 5...very good/high</i></p> | |
| | STRENGTHS | WEAKNESSES |
| | <ul style="list-style-type: none"> • Wide variety of learning experiences suitable for all learners • Majority of content is free if using Oculus based equipment • Good quality of learning content, easy to use and navigate through different apps | <ul style="list-style-type: none"> • Some apps are better than others (i.e. The Human Brain vs Titanic) • Some learning content is very linear which lessens the immersive effect of learning through VR • Limited number of apps currently |
| | OPPORTUNITIES | THREATS |
| <ul style="list-style-type: none"> • Scope to add many new learning apps within Unimersiv • No similar platform/app focused on providing learning experiences • Capacity to upgrade graphics/content on a regular basis as platform is well supported | <ul style="list-style-type: none"> • Content updates are stopped or become less regular • Linear nature of some apps provide for the possibility of limited engagement by learners • Best experienced with more expensive VR equipment which may limit its impact for individual learners without access to this equipment | |

| | |
|---------------------------------------|--|
| Ideal application /utilization | <ul style="list-style-type: none"> • Context of ideal application <ul style="list-style-type: none"> - Well suited as an effective tool for educating low-skilled and low-qualified persons about the topics such as: human body and brain, historical places, history - dinosaurs and Titanic, Space etc. - The platform offers development of customized training programmes (as a paid services), one of the existing training apps include Forklift training which could be useful for the learners as training supporting their future employability - Useful for use in classroom based situations where groups of learners could be taken through the individual apps supported by the tutor • Instructions for preparation <ul style="list-style-type: none"> - The tutor should have a good working knowledge of the app and the learning content to be able to objectively set the learning outcomes for each learner and also to be able to support and advise learners throughout the experience - While not strictly necessary, the tutor should ensure that all learners have sufficient space to properly utilise the controls • Instructions for tutoring <ul style="list-style-type: none"> - The tutor should advise the learners about immersive VR experiences in general, although this app is suitable for beginners or less experienced learners - The tutor is advised to be available to the learner to offer support in case of any obstacles or to further explain the learning content / tasks |
|---------------------------------------|--|

- The app can be viewed by all learners while it is running, it would be advisable to allow learners to observe the tutor undertaking the basics first.
 - The tutor should request feedback from learners in order to properly assess the benefits/impacts of the app in addition to what other VR resources would be the most suitable to support the learner's further learning.
- ***Do's and don'ts***
 - Highly advisable that learners are properly briefed on the use of the VR equipment in order to make the experience as comfortable as possible.

| | |
|--------------------------|---|
| Learning Content | <p>No learning content per se. Tutorials are provided on how to use Sumerian for its various different applications.</p> <p>Essentially, Sumerian is a service that lets you create and run 3D, AR and VR applications. You can build immersive and interactive scenes that run on AR and VR, mobile devices, and web browsers.</p> |
| Learning Outcomes | <p>Knowledge</p> <p><i>The adult learners will be able to:</i></p> <ul style="list-style-type: none"> Identify basic concepts behind the creation of 3d ‘scenes’ and VR apps Operate WebGL 2 and WebVR programming utilities |
| | <p>Skills</p> <p><i>The adult learners will be able to:</i></p> <ul style="list-style-type: none"> Create their own 3D, VR and AR scenes and populate these with their own content include 3D ‘hosts’ Undertake some basic programming |
| | <p>Competences</p> <p><i>The adult learners will be able to:</i></p> <ul style="list-style-type: none"> Create easy to use VR interfaces Upload own content to the Amazon Sumerian platform Amend and update existing ‘scenes’ on the Amazon Sumerian platform, when needed |
| | <p>Activities provided</p> <p>Tutorials are provided in respect of the creation or 3D web content, AR and VR application.</p> |

| Added value for low-skilled/qualified adults | Benefit to low-skilled/qualified adults may be minimal. While the platform is relatively easy to use, some degree of proficiency in utilizing IT/VR equipment is required. This platform is much better suited to being used by a tutor in the creation of content for use in a learning environment rather than being used by the end learner. | | | | | | | | |

| | |
|-------------------|--|
| Learning Content | <p>Inspired by the NASA training programs, the Spacewalk enables learners to embark on a spacewalk 250 miles above the Earth’s surface, something only 217 people have ever done for real. They are tasked with making a repair on the outside of the International Space Station, before being confronted with a terrifying emergency situation.¹</p> <p>In general, the learning content is minimal but does include:</p> <ul style="list-style-type: none"> • Basic knowledge of a spacewalk • Understanding and following commands • Independent thinking in time-sensitive / dangerous situations • Critical thinking and situational analysis |
| Learning Outcomes | <p>Knowledge</p> <p><i>The adult learners will be able to:</i></p> <ul style="list-style-type: none"> • Identify some of the core concepts and process of learning through use of VR experiences • Recall some basic activities implemented by NASA during a spacewalk • Relate to the importance of science and technology in spaceflight • Identify the physical and emotional requirements of an astronaut during a spacewalk • Recognise the responsibility and pressure of completing a defined task within a short timeframe |

¹ <https://www.bbc.co.uk/mediacentre/latestnews/2017/vr-spacewalk>

| | | |
|--|--|--|
| | Skills <p>The adult learners will be able to:</p> <ul style="list-style-type: none"> • Complete simple steps and task required to use the application and complete the spacewalk • Use the VR equipment effectively in order to complete assigned tasks • Analyse the situation and improvise solution to be taken in order to complete defined tasks, both expected and unexpected • Identify and implement effective strategies to complete the tasks under the pressures of both stress and time | Activities provided <p>The learners are tasked with making a repair on the outside of the International Space Station, before being confronted with a terrifying emergency situation.²</p> |
| | Competences <p><i>The adult learners will be able to:</i></p> <ul style="list-style-type: none"> • Demonstrate the ability to undertake and complete an intensive and immersive VR experience • Demonstrate the ability to follow simple instructions and complete tasks as directed • Demonstrate the ability to independently use the equipment required to complete the task • Demonstrate the ability to work under pressure and within time-restricted deadlines | Added value for low-skilled/-qualified adults <p>Limited added value to low-skilled/qualified adults, however, the following do apply:</p> <ul style="list-style-type: none"> • Clear explanation of the tasks to be completed with narrative supports throughout the learning process; this approach supports learners in the belief that they can succeed in the completion of tasks despite obstacles faced • The learning process is straight forward with a set of simple tasks to be accomplished, with the possibility to repeat these processes and practice the tasks until they are accomplished successfully • Short and interesting learning experience; ideal for those unfamiliar with VR experiences • The game gives learners space for independent learning and make them feel “responsible” for their own actions |

| | | | | |
|--|---|---|--|--|
| SWOT analysis | <ul style="list-style-type: none"> • User-friendliness 1 <input type="checkbox"/> 2 <input checked="" type="checkbox"/> 3 <input type="checkbox"/> 4 <input type="checkbox"/> • Pedagogic orientation and standards 1 <input checked="" type="checkbox"/> 2 <input type="checkbox"/> 3 <input type="checkbox"/> 4 <input type="checkbox"/> • Applicability level 1 <input type="checkbox"/> 2 <input checked="" type="checkbox"/> 3 <input type="checkbox"/> 4 <input type="checkbox"/> • Gamification level 1 <input type="checkbox"/> 2 <input checked="" type="checkbox"/> 3 <input type="checkbox"/> 4 <input type="checkbox"/> | | | |
| | <p><i>*1...very poor/low; 2...poor/low; 3...OK/medium; 4...good/high; 5...very good/high</i></p> | | | |
| | STRENGTHS | | WEAKNESSES | |
| | <ul style="list-style-type: none"> • Interesting and immersive insight into basic activities of an astronaut on the ISS, the voice guidance and narratives are of a high quality • Game is straightforward and controls are easy to master, even as a novice. • Suitable for all types of learners, even those unfamiliar with gaming | | <ul style="list-style-type: none"> • Intense VR experience (even on basic settings) which can present challenges even to those familiar with VR. • Only available in one language • App is limited in scope and is very linear in nature, it doesn't include any specific/practical learning content that could be practically utilised by the learners | |
| | OPPORTUNITIES | | THREATS | |
| <ul style="list-style-type: none"> • Definite capacity to expand learning content • Graphics could be updated to increase engagement | | <ul style="list-style-type: none"> • Idea is easy to replicate - other 'Spacewalk' apps already available through Oculus store. • App is no longer supported as such no further updates will be released. | | |

| | |
|---------------------------------------|--|
| Ideal application /utilization | <ul style="list-style-type: none"> • Context of ideal application <ul style="list-style-type: none"> - Well suited as a basic introduction to learning through VR - Could be used as a taster/introduction to STEM subjects and as an introduction to space exploration - Can be used to introduce the importance of technology and science in a practical setting - Can be used as an assistive tool for users to overcome irrational fears (heights, claustrophobia etc.) • Instructions for preparation <ul style="list-style-type: none"> - Ensure that an adequate amount of space is available to move around - It may be advisable to create a dedicated learning space which allows learners to feel safe and to fully engage with an immersive VR experience - The option to play the game while seated could be offered to learners. While this may lessen the impact or the VR experience it can assist in overcoming some of the drawback of an intense VR experience. • Instructions for tutoring <ul style="list-style-type: none"> - The tutor should advise the learners about the 2 options of intensity and level of difficulty. It would be advisable that learners be warned that the experience can be uncomfortable regardless of what level of intensity is chosen. - The tutor should stay in the room and support the learner in case of there is any additional help required. |
|---------------------------------------|--|

- The app can be viewed by all learners while it is running, it would be advisable to allow learners to observe the tutor undertaking the basics first.
 - The tutor should request feedback from learners in order to properly assess the benefits/impacts of the app in addition to what other VR resources would be the most suitable to support the learner's further learning.
- ***Do's and don'ts***
 - Highly advisable that learners are properly briefed on the use of the VR equipment in order to make the experience as comfortable as possible.
 - Ensure that headset is fitted correctly and that the learners vision is not blurred/impaired as this can exacerbate the effects of motion sickness/nauseous and will lead to a poor outcome for the learner, particularly in the context of using VR again in the future.

| | <p>OPPORTUNITIES</p> | <p>THREATS</p> |
| <p>Ideal application /utilization</p> | <ul style="list-style-type: none"> <i>Context of ideal application</i> <p>It is interesting to apply it to generate broad or specific knowledge of various current topics</p> <ul style="list-style-type: none"> <i>Instructions for preparation</i> <ul style="list-style-type: none"> - You have to choose a topic or content on which to display. - Specific instructions and didactic materials will be given on the content in advance. - Provide and use ergonomic and suitable chairs if possible | |

- ***Instructions for mentoring***

You must work on the contents beforehand to be able to deepen, guide and advise the students.

Many of the contents could generate later a work or debate or sharing after the VR application

- ***Do's and don'ts***

- The application can be an ideal complement to work on a specific topic.
- Students can be given the opportunity to propose a topic to be debated or discussed in greater depth after using the application.
- -Take into account students with certain sensitivities

| | |
|-------------------|---|
| Learning Content | Platform to publish and explore in 3D -A rand VR: Visits to museums, nature, sites, science, animals, games |
| Learning Outcomes | <p>This application is interesting for learning results related to the creation of 3D models and sharing them later. It is also very useful for learning about museums and works of art. We will focus on the 3D models "Vincent van Gogh 3D models".</p> <p>Knowledge</p> <p><i>The adult learners will be able to:</i></p> <ul style="list-style-type: none"> • Describe how Vincent van Gogh lived and where • Name objects from his everyday life and his paintings <p>Skills</p> <p><i>The adult learners will be able to:</i></p> <ul style="list-style-type: none"> • Locate the works of Vincent van Gogh • Differentiate between the works of this author and others • Identify Vincent Van Gagh's way of life, through his room <p>Competences</p> <p><i>The adult learners will be able to:</i></p> <ul style="list-style-type: none"> • Determining the importance of Vincent van Gogh in the post-Impressionist art movement, the characteristics of the movement, and link both. |

| | |
|---|---|
| <p>Activities provided</p> | <p>The application allows you to teleport to Rome, hold a beating heart or walk among dinosaurs. Sketchfab VR allows you to discover a showcase of explorations through remote places, fantastic creatures, game worlds, cultural heritage, science and other wonders.</p> <p>Sketchfab is the platform to publish and explore a million things in 3D and VR. With a community of over half a million creators, it is the largest library of VR content in the world generated by user.</p> |
| <p>Added value for low-skilled/-qualified adults</p> | <p>The "Sketchfab" application can be beneficial for low-skilled and poorly trained adult learners. The creativity of students will be encouraged through the use of 3D models, either by creating or analyzing them. Furthermore, through the virtual visits to the more than 600 museums contained in the application.</p> |

| <p>SWOT analysis</p> | <ul style="list-style-type: none"> • User-friendliness 1 <input type="checkbox"/> 2 <input type="checkbox"/> 3 <input checked="" type="checkbox"/> 4 <input type="checkbox"/> • Pedagogic orientation and standards 1 <input type="checkbox"/> 2 <input type="checkbox"/> 3 <input checked="" type="checkbox"/> 4 <input type="checkbox"/> • Applicability level 1 <input type="checkbox"/> 2 <input type="checkbox"/> 3 <input checked="" type="checkbox"/> 4 <input type="checkbox"/> • Gamification level 1 <input type="checkbox"/> 2 <input type="checkbox"/> 3 <input checked="" type="checkbox"/> 4 <input type="checkbox"/> <p><i>*1...very poor/low; 2...poor/low; 3...OK/medium; 4...good/high; 5...very good/high</i></p> | | | | | |

| | OPPORTUNITIES | THREATS |
|---------------------------------------|---|--|
| | <ul style="list-style-type: none"> • It can help to know more in depth concrete works of art • Can help foster creativity by making your own 3D models • The exchange and creation of 3D models is continuous and increases the content repository | <ul style="list-style-type: none"> • Some of the applications of 3D Models are paid • Students who don't like art can be distracted • The excess of 3D models offered does not allow perhaps to concretize a topic and we will only visualize one after another |
| Ideal application /utilization | <ul style="list-style-type: none"> • Context of ideal application It is interesting especially for learning and getting knowledge of cultural heritage and it is recommended for the promotion of creative 3D models. • Instructions for preparation The teacher or instructor must previously select what you want to work on and visualize, in order to better adapt to the content. Previously, didactic and pedagogical materials should be provided to initiate the subject. Ergonomic and adequate chairs should be used, as well as enough space because this application needs a lot of space for movement. | |

| | |
|--|--|
| | <ul style="list-style-type: none"> • Instructions for mentoring You must work on the contents beforehand to be able to deepen, guide and advise the students. Many of the contents, especially the cultural ones, could be the subject of a later work or debate or sharing after the VR application. • Do's and don'ts The application can be the ideal complement to work on a specific topic. Thinking mainly in the area of Art and Culture It can be facilitated to the students and propose them to create some 3D model after using the application Take into account students with certain sensitivities since the application requires movement. As well as situations of certain impact |

| Learning Content | Physical and Urban Geography Contents | | | | | | | | | | | | | | | | | | | | | | | | | | |

| | |
|----------------------------|--|
| Learning Outcomes | <p>Knowledge</p> <p><i>The adult learners will be able to:</i></p> <ul style="list-style-type: none"> • Explain what the physical geography of a particular place looks like • List the different geographical features of a particular area • Explain what the World Heritage Sites are |
| | <p>Skills</p> <p><i>The adult learners will be able to:</i></p> <ul style="list-style-type: none"> • Locate various geographic accidents in a specific area of the Earth • Identify the most outstanding monuments in each country • Locate the most important rivers in the world |
| | <p>Competences</p> <p><i>The adult learners will be able to:</i></p> <ul style="list-style-type: none"> • Determine the different existing landscapes on the earth or in a particular area and relate it to the climate in that same area |
| Activities provided | <p>Google Earth lets you explore the VR world from totally new perspectives in virtual reality. Stroll the streets of Tokyo, soar over the Grand Canyon, or walk around the Eiffel Tower. This virtual reality app lets you see the world's cities, landmarks, natural and wonders. You can fly over a city, stand at the top of the highest peaks, and even soar into space. Cinematic Earth Comes With VR tours and hand-picked destinations that send you to the Amazon River, the Manhattan skyline, the Grand Canyon, the Swiss Alps, and more.</p> |

| <p>Added value for low-skilled/qualified adults</p> | <p>The VR application "Google Earth" can be very interesting and beneficial when it comes to providing knowledge about Physical-Urban or Social Geography to low-skilled/qualified adult students. Especially those who have difficulties with traditional learning methods, as the application provides an extraordinary perspective of concepts and content of Physical-Urban Geography. It allows students to immerse themselves in the world by exploring it at their own pace and, consequently, can improve the understanding of Geography in general.</p> | | | | | | | | | | | | |

| | <p>OPPORTUNITIES</p> <ul style="list-style-type: none"> • It can help to know more about physical geography • We will see the cities as we have never seen them before. With great clarity • It allows a quick understanding of the topics covered. | <p>THREATS</p> <ul style="list-style-type: none"> • Not yet available on many VR glasses platforms • You have to have some previous knowledge of geography so you don't get lost • Lack of interactivity between user and application |
| <p>Ideal application /utilization</p> | <ul style="list-style-type: none"> • <i>Context of ideal application</i> <p>The Google Earth VR application is ideal for teaching and learning Physical-Urban and Social Geography, providing students with knowledge and data that will improve their understanding of the subject in general and other more specific issues.</p> <ul style="list-style-type: none"> • <i>Instructions for preparation</i> <p>The teacher or instructor must previously select what to work on and visualize, in order to better adapt to the content.</p> <p>Previously, didactic and pedagogical materials should be provided to initiate the subject.</p> <p>The application is simple and intuitive and does not need much previous explanation. Ergonomic and adequate chairs should be used, as well as enough space to visualize the application.</p> | |

- ***Instructions for mentoring***

You must work on the contents beforehand to be able to deeper guide and advise the students.

A possible task for the student could include choosing an ancient city and exploring it and seeing the different expansions it has undergone throughout its history, differentiating the typology and urban organization of it. Many Geographic contents can generate later a work or debate or discussion after using the VR application

- ***Do's and don'ts***

The application can be an ideal complement to work on a specific topic. Thinking mainly in the Physical and Urban Geography

Students can be given the opportunity to propose other searches at a later session after using the application

After the session, they could solve a common problem, debate, ask questions, provide documentation....

Take into account students with certain sensibilities because the application requires movement. As well as situations with a certain impact
